

1 **ABSTRACT OF THE DISCLOSURE**

2 A foldable bicycle includes a front fork, a head tube, a support tube,
3 an adjusting member, two support levers, a rear fork, and a hydraulic cylinder.

4 Thus, when the foldable bicycle is folded, the rear wheel is in parallel with the
5 front wheel, so that the user can simultaneously draw the rear wheel and the
6 front wheel to move easily and conveniently, thereby facilitating the user
7 moving the folded bicycle. In addition, the foldable bicycle is folded easily and
8 conveniently, thereby facilitating the user folding the bicycle.
